Linus Torvalds

The Creator of Linux

Pedro Marques @ <Academia de Código_>

Born in 28 December 1969, Helsinki, Finland.

1980 - His grandfather, Leo Waldemar Tornqvist bought a computer.
Linus Torvalds bored of the programs available for the computer he began creating new ones.

1988 - Began studying in Helsinki University.

1990 - First lessons in C.

1991 - (Around April) - Bought his first computer and disappointed with MS-DOS tries to obtain a version of UNIX but can't find any for less than US\$5000. So he decided to create a new operating system based on UNIX.

1991 (August) - He decided to announce on a Minix newsgroup what he had done:

From: torvalds@klaava.Helsinki.FI (Linus Benedict Torvalds)

Newsgroups: comp.os.minix

Subject: What would you like to see most in minix? Summary: small poll for my new operating system

Message-ID: <1991Aug25.205708.9541@klaava.Helsinki.FI>

Date: 25 Aug 91 20:57:08 GMT Organization: University of Helsinki

Hello everybody out there using minix -

I'm doing a (free) operating system (just a hobby, won't be big and professional like gnu) for 386(486) AT clones. This has been brewing since april, and is starting to get ready. I'd like any feedback on things people like/dislike in minix, as my OS resembles it somewhat (same physical layout of the file-system (due to practical reasons) among other things).

Linus (torvalds@kruuna.helsinki.fi)

PS. Yes – it's free of any minix code, and it has a multi-threaded fs. It is NOT protable (uses 386 task switching etc), and it probably never will support anything other than AT-harddisks, as that's all I have :-(.

The birth of Linux

To: comp.os.minix

"Hello everybody out there using minix - I'm doing a (free) operating system (just a hobby, won't be big and professional like gnu) for 386(486) AT clones...."

Linus Torvalds, August 25, 1991

The life

1991 (October) - He announced the first official version.

- 1996 - He finishes his master's degree in computer science

1998 - He received the pioneer award by the Electronic Frontier Foundation for his development of Linux.

2003 - Join the Open Source Development Labs (OSDL), which later became the Linux Foundation.

GIT

2005 - Creates GIT

Git is free and open source, and distributed under the terms of the GNU General Public License version 2.

Git is a version control system for tracking changes in computer files and coordinating work on those files among multiple people. As a distributed revision control system it is aimed at speed, data integrity, and support for distributed, non-linear workflows.

The GIT

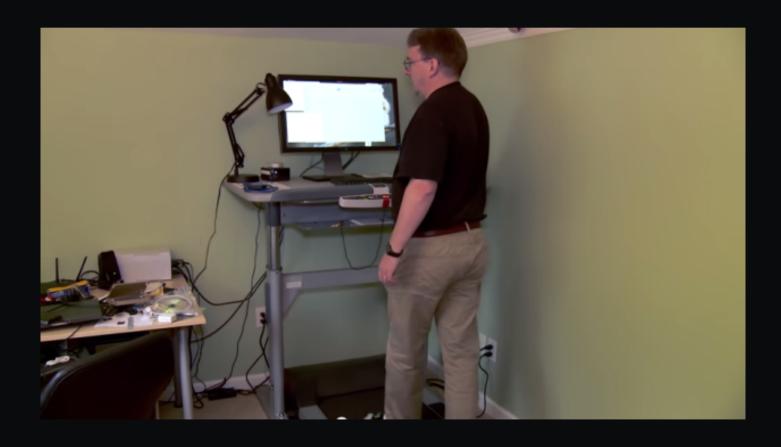

Git is described by Linus Torvalds as "the stupid content tracker" and the name as (depending on your way):

- random three-letter combination that is pronounceable, and not actually used by any common UNIX command. The fact that it is a mispronunciation of "get" may or may not be relevant.
- stupid. contemptible and despicable. simple. Take your pick from the slang dictionary.
- "global information tracker": you're in a good mood, and it actually works for you. Angels sing, and a light suddenly fills the room.
- "goddamn idiotic truckload of sh*t": when it breaks

Linus Torvalds' office

Linus works from home wearing a bathrobe and he uses a walking desk.

"Other" hobbies

His only hobby is scuba diving. As a fun project he created a program called Subsurface, it's an app which can be used to plan dives and collect/share data with other users.

Best Rants

"Kay, this needs to be fixed.

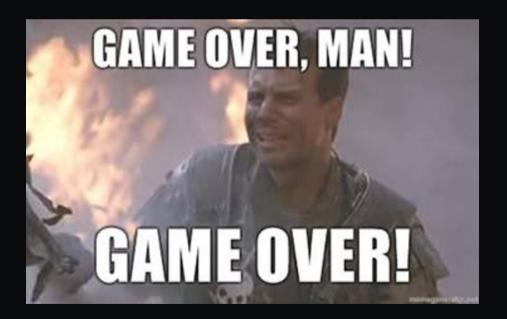

Suggested fix: just use the 'seq_printf()' interfaces, which do the proper buffering, and allow any size reads of various packetized data.

Of course, I'd also suggest that whoever was the genius who thought it was a good idea to read things ONE F*CKING BYTE AT A TIME with system calls for each byte should be retroactively aborted. Who the f*ck does idiotic things like that? How did they not die as babies, considering that they were likely too stupid to find a tit to suck on?

Linus"

Best Rants

"Your whole argument is FUNDAMENTALLY garbage. It's the Disney kind of garbage. It was garbage back then, and it's garbage now."

Best Rants/The Nvidia incident

Just a final quote before I leave

"I like offending People because
I think people that get offended
should be offended."
